

## Equivalent Fractions Worksheet

<p><b>1 a.</b></p> <div style="display: flex; justify-content: space-around; align-items: center;">   </div> <p style="text-align: center;"><math>\frac{4}{16} = \frac{\text{yellow}}{\text{yellow}}</math></p>	<p><b>1 b.</b></p> <div style="display: flex; justify-content: space-around; align-items: center;">   </div> <p style="text-align: center;"><math>\frac{2}{12} = \frac{\text{yellow}}{\text{yellow}}</math></p>
<p><b>2 a.</b></p> <div style="display: flex; justify-content: space-around; align-items: center;">   </div> <p style="text-align: center;"><math>\frac{3}{6} = \frac{\text{yellow}}{\text{yellow}}</math></p>	<p><b>2 b.</b></p> <div style="display: flex; justify-content: space-around; align-items: center;">   </div> <p style="text-align: center;"><math>\frac{6}{7} = \frac{\text{yellow}}{\text{yellow}}</math></p>
<p><b>3 a.</b></p> <div style="display: flex; justify-content: space-around; align-items: center;">   </div> <p style="text-align: center;"><math>\frac{12}{14} = \frac{\text{yellow}}{\text{yellow}}</math></p>	<p><b>3 b.</b></p> <div style="display: flex; justify-content: space-around; align-items: center;">   </div> <p style="text-align: center;"><math>\frac{5}{7} = \frac{\text{yellow}}{\text{yellow}}</math></p>
<p><b>4 a.</b></p> <div style="display: flex; justify-content: space-around; align-items: center;">   </div> <p style="text-align: center;"><math>\frac{4}{5} = \frac{\text{yellow}}{\text{yellow}}</math></p>	<p><b>4 b.</b></p> <div style="display: flex; justify-content: space-around; align-items: center;">   </div> <p style="text-align: center;"><math>\frac{5}{7} = \frac{\text{yellow}}{\text{yellow}}</math></p>
<p><b>5 a.</b></p> <div style="display: flex; justify-content: space-around; align-items: center;">   </div> <p style="text-align: center;"><math>\frac{14}{16} = \frac{\text{yellow}}{\text{yellow}}</math></p>	<p><b>5 b.</b></p> <div style="display: flex; justify-content: space-around; align-items: center;">   </div> <p style="text-align: center;"><math>\frac{5}{10} = \frac{\text{yellow}}{\text{yellow}}</math></p>
<p><b>6 a.</b></p> <div style="display: flex; justify-content: space-around; align-items: center;">   </div> <p style="text-align: center;"><math>\frac{14}{16} = \frac{\text{yellow}}{\text{yellow}}</math></p>	<p><b>6 b.</b></p> <div style="display: flex; justify-content: space-around; align-items: center;">   </div> <p style="text-align: center;"><math>\frac{5}{7} = \frac{\text{yellow}}{\text{yellow}}</math></p>

## Answer Key

<p><b>1 a.</b></p>  $\frac{4}{16} = \frac{1}{4}$	<p><b>1 b.</b></p>  $\frac{2}{12} = \frac{1}{6}$
<p><b>2 a.</b></p>  $\frac{3}{6} = \frac{1}{2}$	<p><b>2 b.</b></p>  $\frac{6}{7} = \frac{12}{14}$
<p><b>3 a.</b></p>  $\frac{12}{14} = \frac{6}{7}$	<p><b>3 b.</b></p>  $\frac{5}{7} = \frac{10}{14}$
<p><b>4 a.</b></p>  $\frac{4}{5} = \frac{8}{10}$	<p><b>4 b.</b></p>  $\frac{5}{7} = \frac{10}{14}$
<p><b>5 a.</b></p>  $\frac{14}{16} = \frac{7}{8}$	<p><b>5 b.</b></p>  $\frac{5}{10} = \frac{1}{2}$
<p><b>6 a.</b></p>  $\frac{14}{16} = \frac{7}{8}$	<p><b>6 b.</b></p>  $\frac{5}{7} = \frac{10}{14}$
